We use a software and also android application which made by cyrus group and we are very satisfied with its use and also technical support from company. Thanks

Dear Sachin Goyal,

We have started our journey with eRecharge Byte. After successful implementation, we moved further to financial services AEPS, DMT, MATM and going to implement Aadhar Pay. Surprisingly everything wrapped up in just within 1-1/2 months and getting excellent responses from our customers. Big thanks to Cyrus for their amazing support and cooperation. Wishing your team all the best.

From day one to the finish, the developers of Cyrus were equally enthusiastic and they wanted to see this product in the market more than me. I have worked with many IT companies in past, but did not see this type of passion and enthusiasm that Cyrus has. And needless to say, the final output was way better than even my imagination. Such a wonderful team to work with. Highly appreciated and provided excellent service at a reasonable cost.

Before closing the deal with Cyrus I was also in the communication with some other recharge solutions companies. But most of the companies were not able to provide me the software as per my requirements even some of them didn't give me reply also. When I communicated with Cyrus they understood my requirements & assured me that they will provide me the best solution based on my requirements.
